

## SINGLE LID CASES

The Ultimate Protection For Your Sensitive Equipment

*One of our injection molders in action*

## INJECTION MOLD

This is SKB's latest venture in our quest to provide the most innovative hard shell case products. Injection molding is an expensive investment and there is no room for error. Made with extreme pressure, even the smallest injection molded part requires a very large and heavy mold. SKB has molds that are nearly 20 tons! Many of our parts, such as our patented Trigger Latches are produced by the injection mold process. Our 3i case series includes a gasket that makes the case watertight and dust proof. Our latest injection molded cases for guitars and basses are very popular with touring musicians. These cases have dual lives as they are also used for military weapons. Never before has an ATA flight case been so lightweight, yet so advanced.

*Molds rotating during production*

## ROTO-MOLD

In 1997, SKB invested in roto-mold machinery. These molds are ideal for making larger cases and cylindrical cases. The PE roto-mold material starts as a fine powder that is measured according to the size of the case. The material is then sealed up in a multi-piece aluminum mold and fixed on a biaxial rotating wheel. The material is heated at 800° in a very large oven while constantly rotating. The powder melts and coats the inside of the mold and after cooling, the cast is disassembled and the case is removed. Roto-molding is great for providing maximum protection and can withstand maximum impact in transport.

*Vacuum mold for keyboard case*

## VACUUM FORM

Also known as thermal form, this was the first and most recognized "SKB Style" case. This method is very popular for guitar or band instrument cases. In 1990, SKB developed the first vacuum formed rack case. Acrylonitrile Butadiene Styrene (ABS) or Polyethylene (PE) is formed into solid sheets of material. The sheets are heated and are vacuum formed around aluminum castings, thus taking the shape of the mold. The edges have the distinctive aluminum valance that provides rigid construction as well as a secure fit. Vacuum formed products are known for their light weight and extreme durability.

## OUR STORY

*SKB Owners/Founders: Dave Sanderson and Steve Kottman*

In 1977, two ambitious college students developed the first SKB case in a small Anaheim, California garage. Today, SKB is known around the world as the leading innovator and manufacturer of the finest instrument and equipment cases. Since the inception of our company, in addition to SKB branded products, leading companies have proudly supplied SKB cases for protection of their own products. SKB builds cases for a variety of markets (Industrial/Military, Sports, Music and Photo/Video) and that diversity allows us to be more creative and innovative in our case designs across the board. We have a true sense of accomplishment for more than 40 years of steady growth and for our adherence to quality standards that has made us industry leaders. We never lose sight of the fact that our customers give us the opportunity to excel and we are grateful for their trust and loyalty. We remain dedicated to the assurance that every SKB case has been manufactured with an unconditional commitment to unsurpassed quality and superior protection.
